Fabulous Flubber

Materials

- Elmer's glue
- 20 Mule Team Borax (be sure to read and follow all cautions on the Borax box label)
- 2 small plastic cups
- Popsicle stick
- Water
- Water soluble markers

Directions

1. Place 2 teaspoons of water in a small plastic cup. Add 1/4 teaspoon of borax and swirl until as much borax dissolves as possible.
2. Place 2 teaspoons of water in another cup and add 2 teaspoons of Elmer's glue. Mix with a Popsicle stick.
3. Continue mixing the glue and water solution, and have your partner slowly add the borax solution. You will only need to use a small portion of the Borax solution.
4. When you have some nice thick Flubber, pull it off the Popsicle stick and move it back and forth between your hands.
5. Flatten your Flubber into a pancake and use the markers to make a face or other design on the Flubber.
6. Pull and stretch the Flubber so your Flubber design changes in weird and wild ways!
